Meeting records 📄 Transcript 🎙 Recording

Summary

Onboarding session established business strategy and prioritized automating manual workflows for podcast advertising management and inventory scaling.

Business Strategy and Tools

Company utilizes a high-quality influencer-style advertising approach to drive significant revenue growth. Internal tools Molly and Bob provide transparency for creators while managing complex ad inventories.

Workflow Challenges Identified

Operations currently rely on manual Excel tracking for rate cards and insertion orders, which inhibits efficient scaling. Automated systems are needed to handle availability checks and inventory management.

Automation and Integration Goals

The primary objective is integrating Podscribe via API to automate placement verification and RFP filtering. Establishing 3-week development milestones will ensure project momentum and tangible progress.

Decisions

Aligned

- **Three-week milestone review cadence established** The product development review cadence is set to every three weeks to ensure progress is measured against specific milestones as a condition for executive engagement.

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

Next steps

- ☐ [Thomas Mancusi] Share Master List: Provide access to the Excel master list document containing advertiser and show metrics.

Details

- **Introductions and Participant Background:** Thomas Mancusi and Jade Nakabayashi introduced themselves and confirmed their respective locations, with Jade Nakabayashi in Brooklyn, New York, and Thomas Mancusi in Mount Pleasant, South Carolina. Thomas Mancusi shared details regarding their long-standing history in the audio industry, including early career experience in the late 1990s and personal history regarding friends and family in Hawaii.
- **Meeting Objectives and Onboarding:** Jade Nakabayashi stated that the purpose of the meeting was to conduct onboarding and gain an understanding of current roles, responsibilities, and workflows at Daylight. The session was intended to allow Thomas Mancusi to explain the ideal "tomorrow state" for the product and highlight existing pain points in their daily operations.

- Thomas Mancusi's Professional Experience and Company Growth:** Thomas Mancusi provided a summary of their 28-year career in the audio business, noting their role as the first person to place an audio advertisement on Pandora and their subsequent experience in podcast and YouTube advertising since 2012. Since joining the current company in March 2022, Thomas Mancusi reported that the business grew from 4 shows and 1 million dollars in revenue to 54 shows and approximately 61 million dollars in projected revenue, all achieved with the smallest sales team in the industry.
- Sales and Advertising Philosophy:** Thomas Mancusi described a strategic differentiation in the company's approach, which treats podcasting and YouTube as influencer marketing rather than the "radioification" method used by competitors. By avoiding the practice of stacking three pre-roll ads and instead focusing on "pristine" ad placement, the company is able to secure a larger share of advertising dollars relative to content consumption.
- Internal Tooling and Creator Transparency:** Thomas Mancusi introduced internal tools named "Molly" and "Bob," which are used for scheduling ads and managing show data. Thomas Mancusi emphasized that these tools are designed to shine a spotlight on creators, providing transparency by allowing partners to see the specific spots sold and the associated dollar amounts. While these tools are not client-facing for brands to protect sensitive pricing data, they are shared with creators like "Matt and Abby" to help manage their ad plans.
- Management of Insertion Orders and Inventory:** Thomas Mancusi detailed the manual process of handling Insertion Orders (IOs) and managing ad inventory. They emphasized that they rely on an internal algorithm to prevent overloading shows with advertisements, noting instances where they decline adding extra spots to a show—such as a fourth ad in a single week—to maintain ad quality. Thomas Mancusi expressed the need for a system that can automate these availability checks and provide clear, coded status updates.
- Revenue Growth and Ad Placement Strategy:** Discussing the Sean and Ryan show as a case study, Thomas Mancusi highlighted that the show grew from 9.5 million dollars in revenue under previous management to a projected 17 million dollars with the current team. Thomas Mancusi explained that their specific ad placement strategy requires ads to be over one minute long, positioned early in

the content, and isolated as "commercial islands" within the show's fabric, rather than grouped together, which preserves audience retention.

- **Technology Integration Needs:** Thomas Mancusi and Jade Nakabayashi discussed the gap between the current technology and the required functionality. Thomas Mancusi proposed that the system should integrate with Podscribe via an API to compare actual ad placements against their "perfect" templates. This would allow the system to automatically provide a rating based on how closely each episode adheres to the company's established placement guidelines.
- **Manual Data Management and Rate Card Maintenance:** Thomas Mancusi explained that they currently maintain a manual Excel "Master List" to manage rate cards, client information, and show details because the existing internal system lacks the capability to store this data. They utilize metrics like sell-out percentages over eight-week periods to adjust pricing, though they noted a current lack of clear, automated visual indicators for account cancellations or revenue shifts.
- **Performance Analytics and CPM Management:** Thomas Mancusi described using Podscribe to pull data from Spotify video, YouTube, and Open RSS to monitor campaign performance. This integration allows the team to track whether ads are over-delivering and helps determine when to hold or adjust Cost Per Mille (CPM) rates based on audience changes and ad performance metrics.
- **Automation of Administrative Tasks:** Thomas Mancusi identified several opportunities for automation, particularly regarding the "Master List." They requested that the system be capable of handling Request for Proposals (RFPs) by automatically filtering out shows that have already hosted specific clients in the last three months, cross-referencing against vetting lists, and filtering by genre, which would eliminate the need for significant manual copy-pasting.
- **Project Timeline and Collaboration:** Thomas Mancusi emphasized the importance of hitting milestones every three weeks to maintain the project's momentum. They expressed confidence in their colleague, Kate, who possesses deep knowledge of finance, talent, and ad operations, and stressed that they will provide time and insight as long as the project demonstrates real, tangible progress.

Understanding User Needs w Product (Thomas) - Transcript

00:00:00

Thomas Mancusi: Hello.

Jade Nakabayashi: Hey,

Thomas Mancusi: How are you today?

Jade Nakabayashi: I'm well. How are you?

Thomas Mancusi: I am well. Where are you located?

Jade Nakabayashi: I am in Brooklyn. How about yourself?

Thomas Mancusi: Uh, Mount Pleasant, Charleston, uh, South Carolina.

Jade Nakabayashi: It looks beautiful there.

Thomas Mancusi: Thank you. Thank you. Born and raised in Long Island. Yeah.

Jade Nakabayashi: Nice.

Thomas Mancusi: What about you? Are you from Brooklyn? Born and raised.

Jade Nakabayashi: I'm from Hawaii.

Thomas Mancusi: Oh, nice. My best friend has been there for the last 30 years.

Jade Nakabayashi: Oh, wow. Where else?

Thomas Mancusi: Uh the big island uh oh I don't know he had a nice restaurant called the town um town restaurant.

Jade Nakabayashi: Oh, I think they end there. Yeah. Yeah.

Thomas Mancusi: Yeah Hawaii um he owned that and two other ones.

Jade Nakabayashi: Yeah.

Thomas Mancusi: Um so wherever that was town Kamaya Kamuki I think it was at the time.

Jade Nakabayashi: I'm okay. Yeah, I've been there.

00:00:48

Thomas Mancusi: Uh Honolulu.

Jade Nakabayashi: That place is good.

Thomas Mancusi: Yeah.

Jade Nakabayashi: Yeah. Yeah. Yeah.

Thomas Mancusi: Yeah.

Jade Nakabayashi: That's funny.

Thomas Mancusi: That was my best friend since third grade.

Jade Nakabayashi: How cool.

Thomas Mancusi: Um,

Jade Nakabayashi: Wow.

Thomas Mancusi: but I never went in and I'm actually No,

Jade Nakabayashi: You never

Thomas Mancusi: no, me and me, him, and another cat. So,

Jade Nakabayashi: won.

Thomas Mancusi: he was my best friend since third grade and another kid moved next door to me in sixth grade. And the two the three of us went cross country for two and a half months um like in between like say community and regular

Jade Nakabayashi: Have

Thomas Mancusi: college um and bought a car together and did all this stuff,

Jade Nakabayashi: fun.

Thomas Mancusi: but I've never been there.

Jade Nakabayashi: How long have you ever been?

Thomas Mancusi: like just um you know been married,

Jade Nakabayashi: You got to go.

Thomas Mancusi: got divorced, have you know had my kids 100% since they were 13 and they're 21 now. Uh yeah.

00:01:30

Jade Nakabayashi: you

Thomas Mancusi: Yeah. Working all that stuff.

Jade Nakabayashi: know.

Thomas Mancusi: But so what do you do? I know someone told me why we were sitting today, but does it have to do with the

Jade Nakabayashi: Yeah. Yeah. Yeah. So, thanks so much for taking the time.

Thomas Mancusi: product?

Jade Nakabayashi: I'm helping Sam and team out with the new product. Um, I'm brand new and I'm pretty new to the podcasting advertising world. Um, so treat me like I don't know anything. Um so the effort here is to I'm here like doing onboarding is one aspect of this

Thomas Mancusi: Yeah.

Jade Nakabayashi: and then really trying to understand sort of the roles and responsibilities across daylight and then also sort of give you all the space to sort of talk about what your ideal needs are and vision is for sort of the tomorrow state of the product.

Thomas Mancusi: Yeah.

Jade Nakabayashi: Um, but I've really been focusing on like just understanding core workflows and having you walk me through

Thomas Mancusi: Cool.

00:02:21

Jade Nakabayashi: actually how you're using the tools today. Um, and as you're doing that, sort of talking about like what are the pain points that you're experiencing, what would you like to see tomorrow. Um, but if we could start out just by you telling me a little bit about like what your role is, like what your main responsibilities are,

Thomas Mancusi: Yeah. Yeah.

Jade Nakabayashi: and like what sort of keeps you up at night.

Thomas Mancusi: So, name's Thomas Vancoui. Been in the audio business for 28 years. used to do Howard Cern live reads, you know,

Jade Nakabayashi: Oh,

Thomas Mancusi: on radio late 90s. Um, was the first person to ever put an audio ad on Pandora.

Jade Nakabayashi: amazing.

Thomas Mancusi: Before that, it was all pre-roll video on display.

Jade Nakabayashi: Yeah.

Thomas Mancusi: And have been advertising podcast and YouTube since 2012. I go to these companies and I leave them when they have a lot of money. So, um, previously even before this company, I worked for another one. I got there, it had a million in revenue.

00:03:08

Thomas Mancusi: I left after seven years doing 280. Um, got here March of 2022 three or something like that. Um, and we had four four shows and a million in revenue. Now we have 54 shows and we'll do about 61 million in revenue.

Jade Nakabayashi: I

Thomas Mancusi: And I'm the number one salesperson as well. So we have the um smallest sales team in the industry.

Jade Nakabayashi: Wow.

Thomas Mancusi: And this is all being and this all this all could be done because of doing the antithesis of what the rest of the industry is doing. We treat podcasting and

YouTube as influencer marketing where our competitors treat it like the radioification of podcasting where they run three pre-rolls backtoback.

Jade Nakabayashi: She's got

Thomas Mancusi: um run their ads at 70 and 90% of the content. And we do something a little bit more pristine which allows us to get our unfair share of advertising dollars compared to consumption.

Jade Nakabayashi: really quickly, not to interrupt you, but do you mind if I record this session really quick just for my reference to refer back to?

00:04:12

Thomas Mancusi: No, I don't care. No,

Jade Nakabayashi: Great.

Thomas Mancusi: I don't care.

Jade Nakabayashi: Thank you.

Thomas Mancusi: Yeah. So, it's it's a little unique what we do. Um like all of our ads I have an algorithm in my head. um that that most people like Kate and them know now and that we even write down to give to the shows. So like where our ads have to run um is different than most people, right? The way we do our ads, the the way they're priced. Even the way we even the way we put them into the show is different. Most people use a digital ad insertion,

Jade Nakabayashi: Mhm.

Thomas Mancusi: we actually leave it up to the content provider to upload it within the file itself. So there's a a lot of things for you. um all that s*** is up here. Um but at the end of the day, we're do know that like so part of this is what I wanted when I came here. Um I had created something similar to scale audio boom from 2 million to 78 million a year using a Salesforce integration that we called lyrical making it custom.

00:05:11

Thomas Mancusi: And I wanted to sell that as a software as a service to my competitors years ago. And my goal here is to have this also be sold as a software as a service to my competitors because there's a big need in the entire industry that does not have what we're

Jade Nakabayashi: Yeah,

Thomas Mancusi: creating.

Jade Nakabayashi: it sounds like I mean just again I'm very new but just from what I've heard it does sound like you all have a really unique approach as you mentioned as to the way that you're selling and like are actually considering ing like what the shows are and like who the hosts are and are doing things a little more authentically.

Thomas Mancusi: Even even the tech like this this this this doc this one thing I show shows when

Jade Nakabayashi: Um

Thomas Mancusi: I'm talking to them. Um, like we're the us and the other company I worked for are really the only two companies in the whole industry that show Matt at Abbey.

Jade Nakabayashi: Mhm.

Thomas Mancusi: Every spot we sell and the dollar amount we sell it, right?

00:06:04

Thomas Mancusi: So, we're very um we like to shine a spotlight.

Jade Nakabayashi: Yeah.

Thomas Mancusi: Daylight likes to shine a spotlight on the creators and be very transparent. So, um like even that little thing is different and

Jade Nakabayashi: Is that That's the That's how you go in and sort of schedule the ads manually,

Thomas Mancusi: makes that's Molly.

Jade Nakabayashi: right? That's bot.

Thomas Mancusi: So, by the way, the reason why everything's called Bob or Molly is because of me. Um, you know, I think you could get one look at me, but also the tattoos I have that say Bob Molly and every email is is one love. So, and I've been doing that for 20 years in this business. So, um, yeah. So, Molly or Bob, what you were looking at is an offshoot of Molly, which is its own interface, which is called Bob.

Jade Nakabayashi: Yeah. Okay.

Thomas Mancusi: Yeah. Um,

Jade Nakabayashi: But is that that's not customerf facing, right? That's just what you all are using to schedule the ad

00:06:59

Thomas Mancusi: it's not customerf facing to said brands because I would never allow them f*****

Jade Nakabayashi: slots.

Thomas Mancusi: see everybody else's cost or where they're being spotted in a particular show because you have to follow that um slot position in the podcast.

Jade Nakabayashi: Yeah.

Thomas Mancusi: Uh, that is because because we're multif faceted facing. So this therefore would not be brand or avat a avatar advertiser client. However,

Jade Nakabayashi: Right.

Thomas Mancusi: for the said show Matt and Abby, it would be client facing to them because it's their ad plan.

Jade Nakabayashi: Oh, I see. Okay, that's helpful. Um, I think maybe it would be helpful if you could actually like talk me a little bit,

Thomas Mancusi: Yeah,

Jade Nakabayashi: pull up the tool, like screen share, and I feel like you have a really good perspective on

Thomas Mancusi: I use I use this tool more than everyone else besides Kate.

Jade Nakabayashi: Yeah.

Thomas Mancusi: So Kate and I are the P P1 and P2 users. Um so let me just see if this says anything. So uh she wants to add a fifth spot to unplanned.

00:08:07

Thomas Mancusi: So unplanned is sold out right now, right? I only did a fifth bid roll. I have to ask I have to, you know, make the show happy to do it, right? Which is not normal. So, she's asking, "What is the minimum rate I can do?" I ask, you know, I need to know who's the client. Is it a new spot? Is it a client coming back at a lower rate? Lisa only bought two spots, but it's through an agency I don't give a s*** about. So, rate was probably a 7K. So, now I go in here. Like, I have a photographic memory. So, when I was looking at this to talk to you, I already saw it. So, there's some rates that are 7,000 4,000. You know, one rate in this one month is \$8,555, I think, or our place 8,160. So, I already have a number in my head. There's nothing now. Now, something could be created to give this out to other people because I could put my head into the sellout percentage number, the available unit, the fit sold spot.

00:09:08

Thomas Mancusi: All that can be automated. It doesn't have to f***** sit here. Um, all right. That's just one. Let me just see emails. Um, all right. So, three confirming IO's on the way. This is signing IO's which go into the system. So this will be good for you to see, right? So this is a client, an agency sending us an agreement. This is called an insertion order. This is what needs to be done before you have any data really inside the

Jade Nakabayashi: Yeah.

Thomas Mancusi: system. Right? So this is they're buying Club Random with Bill Maher for two spots. Um when he he emailed me and he said, "Thomas, I want to do this." I had to go into Molly. I had a pull up club random with Bill Maher, right? And now he said I want to run early August. This is all off the top of my head. Um 8:17 I don't want to run because there's already 8 817 there's already three spots.

00:10:09

Thomas Mancusi: I don't want to add a fourth spot here, right? Because I have an algorithm in my head. You got to be an a*****

Jade Nakabayashi: What?

Thomas Mancusi: to run four spots in one week and one in the next week. I'll kill somebody. You're fired, right? Because then you f*** with my algorithm. So, I won't give him that week. Even though the system would spit out, hey, Thomas, week available. I needed to say, here's this available, but it's coded red because there's three brands here. A24 should be green because there's only one ad here, right? So, I told him A24. I didn't give him 817. So, for me to sign this, oh, give me the avail. I have to go look at availability. And it's a new show, so I don't go in here and look at anything. I'm not going to sign this because this is going to take time away from what we're doing. Um, all right. Don't care.

00:11:04

Thomas Mancusi: Um, IO, that's the one he's talking about. Don't care. All right. Uh, I show budget for this, but checking with client. Um, all right. So, what I do here is right now Jay wrote Jay Green Networks here from Content Partnerships was going to talk to Sean and Ryan show. Well, I I I do I do too. At 12:30, we do 11 million. That's just an embedded ads. We do another four. So about and just to give you context, this show last year was the same exact size and only did \$9.5 million with cumulus and has 140 sellers.

Jade Nakabayashi: Hello.

Thomas Mancusi: This is just embedded ads. So that's 11 million. There's a whole another social media and all this other s*** and and Spotify video. We're gonna get him like 17 million this year. and two set three sales people. one one full-time sales now two full-time sales rep but um so what I

Jade Nakabayashi: Can you talk a little more about like why the way that we're selling ads is so much better and like profitable

00:12:06

Thomas Mancusi: was

Jade Nakabayashi: and like

Thomas Mancusi: yeah um I mean it's really hard because it's my like people have asked me to do this but it's really my head right Willie everybody knows so like daylight media you'll go to one of my

Jade Nakabayashi: Yeah.

Thomas Mancusi: shows right so I take you to Danny Jones. Danny sponsors actually.

Jade Nakabayashi: Amen.

Thomas Mancusi: Um, so these little blue marks are the ads right now. When I show you how he's doing the ads, I only care about these ones that are over a minute long. Those are the host ad reads that are on YouTube and audio. He's doing the first ad at the 22 minute mark of a two hour at the 9% eight eight percent mark to 10% then I tell him I want every other ad 12% away from one another but I never want the last ad. So his third ad runs before 50% of the mark.

Jade Nakabayashi: Right.

Thomas Mancusi: So the fact that there's more people listening right because longer the content at 70% of the content 30% of the audience is gone already even if 40m minute podcast.

00:13:23

Jade Nakabayashi: Yeah.

Thomas Mancusi: So all my ads have to run early. They all have to be longer than we sold it for. And they have to be commercial islands. So now you go to um let's see, we'll go to a similar podcast. I don't want to do Joe Rogan, but say say J Shetty. I guess we'll all we go with J Shetty and they're running three pre-rolls before the show even starts.

Jade Nakabayashi: Oh, I see. It's like the way that it's distributed and the way that the cadence is.

Thomas Mancusi: Yeah.

Jade Nakabayashi: I listen to

Thomas Mancusi: So it I don't go back to back to back.

Jade Nakabayashi: like

Thomas Mancusi: Mine have to run earlier in the content. They can't be they have to be commercial isolated islands embedded within the fabric and the content of the show.

Jade Nakabayashi: Yeah.

Thomas Mancusi: The host can't tell people their f***** is radio time for an ad. You know, there's a there's a 47point thing they all have to do,

Jade Nakabayashi: Yeah,

Thomas Mancusi: but it's only in my

00:14:24

Jade Nakabayashi: that's that makes sense because like you listen to some stuff and then there's like a stack of ads at the beginning and you never

Thomas Mancusi: head.

Jade Nakabayashi: hear them and then you listen to other stuff and it's like the content doesn't like gracefully lead up to the ad. It just like cuts off really abruptly.

Thomas Mancusi: Yeah. Yeah. Next thing you know, you have John Stewart who I sell doing an ad for two minutes for smalls and it sounds like a f*****

Jade Nakabayashi: So

Thomas Mancusi: standup comedian, right? Like it's, you know. So,

Jade Nakabayashi: yeah.

Thomas Mancusi: and then the way I price, I price lower than the whole industry in the beginning because it's it's a it's a direct respon. as But yeah, it's crap. It's a direct response. All right, once it works, because the the model is so pristine, I know it's going to work better than every one of my competitors,

Jade Nakabayashi: Yeah.

Thomas Mancusi: but I also treat it like supply and demand metrics. So, no podcast before they sign with us has to agree to everything, all these points before I'll work with them.

00:15:17

Thomas Mancusi: That's why you could do 62 million with two salespeople. It's a circle. So, we create circles and the the tech is another circle.

Jade Nakabayashi: So, sorry. Go ahead. Yeah, that's what I was going to ask about next is like, so it sounds like you have this like really unique and smart structure that we're applying to the way that we're selling ads and booking them in the shows. Um, how does the tech align to that? Do you feel like there are ways that the tech today is implementing that like algorithm that you have

Thomas Mancusi: No, not at all.

Jade Nakabayashi: in your head?

Thomas Mancusi: The text should be checks and balances automatically have an interface automatically have an

Jade Nakabayashi: Yeah. So like what are like ways

Thomas Mancusi: interface into podscribe that so what I just showed you I'm an adviser with that company but like that is you could take my my

Jade Nakabayashi: Yeah.

Thomas Mancusi: template of when the ads are supposed to run compare it to every episode in Podscribe have an API to Podscribe which then gives you a rating based on how close they were to our idea of the perfect ad placement.

00:16:24

Jade Nakabayashi: How are we using Pascribe

Thomas Mancusi: So, right now for Podcribe,

Jade Nakabayashi: today?

Thomas Mancusi: if I want to Oh, sorry. I didn't mean to do that. I just shut my video up. So, right now, we'll have somebody come up to us and say, "Hey, how's my delivery?" Or, "I want to." So, this is Molly. This is Molly.

Jade Nakabayashi: Yeah.

Thomas Mancusi: One, two, three, four, five. Five open, right?

Jade Nakabayashi: Yeah.

Thomas Mancusi: And then I have two ones Scott created for me that are revenue based. And then I have Molly Bob.

Jade Nakabayashi: Mhm.

Thomas Mancusi: So here is you I keep open for revenue. It gives me insights. So right now we're doing a Sean Ryan call and I have to figure out okay nutrition ends

Jade Nakabayashi: Mhm.

Thomas Mancusi: in July. Let me reach out see if they want August. Um you know I know Harry's canled. So right here, there should be something that instead of in my photographic memory, both of these brands, Hillsdale canceled the annual because Sean Ryan said something bad about Trump and

00:17:19

Jade Nakabayashi: Uh

Thomas Mancusi: then Harry's canceled because they just got out of the industry, but these should say cancelled. There used to be revenue here. So there should be a red line.

Jade Nakabayashi: Mhm.

Thomas Mancusi: There should be some. So I know not to reach out.

Jade Nakabayashi: Yeah.

Thomas Mancusi: I just have worry I know to reach out to Sipstation because we ran in April and June for a test campaign. Now it's ready to come back. So that use that this we're getting on the phone with Sean Ryan and and Jay Green gave out the wrong information. So I wanted to show them how to do it. This is the sell through percentage of everything we have on the show for the X90, previous 90. I look at this every time, every Monday when I want to do I increase the cost of a show or decrease it based on the sellout percentage over the last eight weeks and the next eight weeks. Um, here I'm finding out I'm going to look to sell to a new brand.

00:18:20

Thomas Mancusi: I'm going to Danny Jones. A new brand wants to come in. You know, my ray card is one thing I and I'll show you. We have a whole master list that doesn't live here. Has to live in Excel because this system can't take it. But Danny Jones um for August, I'm going to look at okay, you know, I could do this in my head and tell you the average unit rate is probably around 54, but not anybody else can. So, it's 52. Um I I don't want to go below my average unit rate for somebody.

Jade Nakabayashi: Mhm.

Thomas Mancusi: So I know to keep the rate I want to increase the average unit rate every like two months, right? Because the sellout percent is an al sellout percentage increase the average unit

Jade Nakabayashi: Yeah,

Thomas Mancusi: rate.

Jade Nakabayashi: that makes

Thomas Mancusi: So here is the same thing as that.

Jade Nakabayashi: sense.

Thomas Mancusi: It's a sellout percentage. But um this is what I use for here. You asked me how do I get back to how we use Podscribe.

00:19:21

Thomas Mancusi: Um all this information, right? So this is Row Nutrition Sean Ryan show ran. I want to come into one screen. I want to see what when it ran. I want to see how much I sold it for. So we're selling one 60-cond commercial on Sean Ryan for \$28,500 a spot. He does six ads per episode. Um, and this will tell me Podscribe speaks to Spotify video, speaks to YouTube and the Open RSS because it lays a pixel on that data on the RSS data. It lays a pixel. It uses an AP API integration for the YouTube data.

Jade Nakabayashi: Yeah.

Thomas Mancusi: So, we can go here and look how each episode did. I sold it at 1.5 and it's over delivered, right? We also know how much I sold it for. If the audience increased, I could hold the CPM. There's so many different variables here.

Jade Nakabayashi: Yeah. So, it's pulling in all the data for how the ad units actually

Thomas Mancusi: Yeah.

00:20:20

Thomas Mancusi: And then here, I could either go by advertiser.

Jade Nakabayashi: performed.

Thomas Mancusi: I have an avail for buoy. Excuse me. I can't see.

Jade Nakabayashi: And the rate pricing is something that you're doing manually based on that rate card that's in the Excel document that you mentioned.

Thomas Mancusi: Yeah. I'm gonna show you two seconds.

Jade Nakabayashi: Okay.

Thomas Mancusi: But before you can do anything, because everything's personal endorsement, we have to ask the hosts if they want to work with the brand.

Jade Nakabayashi: Yeah.

Thomas Mancusi: So, we have to vet everybody first. So, that's what this is.

Jade Nakabayashi: Yeah.

Thomas Mancusi: And then as far as hold This is similar to actually I'll just pull it up. So this is the master list. This is something I manually do every week. Every I add advertisers. I add I increase or decrease an audience because it goes up or down and then I increase. So this would be um the weekly show with John Stewart, host name, genre, description. I need to show one sheet.

00:21:32

Thomas Mancusi: I need the Apple RSS. I need the YouTube link. I need male female media aids. Now I my master list mirrors 90% of the of our brand of our clients master list because you just do a lot of copy and pastings. So all this information is on here because it's usually asked for. And then the cost, net CPM, the promo code we use, how much is on the RSS versus how much is on YouTube versus how much is on Spotify video, where the ad is running, the last six months of advertisers, which, you know, I don't want to right now I can't do in the system. Um, attribution, the duration, just a bunch of s***.

Jade Nakabayashi: Can you share this doc with me?

Thomas Mancusi: Yeah.

Jade Nakabayashi: Oh, thanks. And then this is just something that you're own because it's is are other people managing this with you or it's just you owning this?

Thomas Mancusi: that document.

Jade Nakabayashi: Yeah.

Thomas Mancusi: No one's allowed to touch it but me.

Jade Nakabayashi: Okay.

Thomas Mancusi: Um, yeah.

00:22:44

Thomas Mancusi: So, I mean, I use it a ton, right? Um, there's so many ways to do it. I can look through I look through this information for see which one of my ranking clients, how much they're spending, which agencies, which clients direct. Um, and then every time I do an RFP, I have to go in there, right? So, say Quint, they're looking for new shows. I have that master list of 57 shows. I want the system right away for step one is take every f***** show that's on quint already which is 28. So right right away the system should delete anything that's been on quint the last three months or forward

Jade Nakabayashi: Yeah.

Thomas Mancusi: looking unless it's like a unique case then I can override it. But anyway that's step one. Then step two is everybody who already the vet, right? Have to go back to the vet. And anyone who said no, they got to go off the master list, right? And then we can even say they're only looking for true crime and comedy and news and everything else comes off the list, right?

00:23:52

Thomas Mancusi: So there's so many I I could sit here all I could sit here all day

Jade Nakabayashi: Yeah, that should that should have

Thomas Mancusi: and tell you what you guys need. I'm just waiting for Kate to get involved because then I know some now there's going to be timelines and once Kate's involved, things will move up and speed up and then I can, you know, until I see s*** done, I can't give more. Like I'm not wasting my time. So like it has to be more real and I will give you guys as much time as of my my mind you

Jade Nakabayashi: Yeah.

Thomas Mancusi: want but I have to see every three weeks that at least milestones are being

Jade Nakabayashi: Yeah,

Thomas Mancusi: hit.

Jade Nakabayashi: that's fair. I mean, I you know, I'm brand new and Kate is very much involved and she's been walking me through sort of the

Thomas Mancusi: Yeah. Just so you know Kate and I have a relationship.

Jade Nakabayashi: over.

Thomas Mancusi: So Kate um you know started with me as an assistant like a

00:24:43

Jade Nakabayashi: Oh, wow. That's wonderful.

Thomas Mancusi: operations and you know she could be the chief COO for this
f*****

Jade Nakabayashi: That's so great.

Thomas Mancusi: company.

Jade Nakabayashi: That's really I

Thomas Mancusi: Yeah. So and I mean I I gave her up to go do this because I know this is the most important part of the company right

Jade Nakabayashi: love

Thomas Mancusi: now because I've done it already.

Jade Nakabayashi: Yeah, you back with this company.

Thomas Mancusi: I don't even what?

Jade Nakabayashi: You can always take her back when you're

Thomas Mancusi: Oh, no. I will.

Jade Nakabayashi: done.

Thomas Mancusi: Like I this this will be done. Like I need her to do it because I you know I just she has a very unique brain,

Jade Nakabayashi: Yeah,

Thomas Mancusi: right? There's not anyone else at this company that knows the sales side. Like I like she knows my she knows the finance side.

Jade Nakabayashi: she she knows it.

Thomas Mancusi: She knows the talent side.

Jade Nakabayashi: Yeah.

Thomas Mancusi: She knows the ad operation side. So she knows everything. And I knew she would be the only person because you have to have that unique ability to do anything with f***** tech because you can have a bunch of tech people who don't know any of that stuff.

Jade Nakabayashi: Yeah, she's been so helpful. And that's I mean that's what I'm trying to do is like absorb and understand all of this knowledge and the way that people are actually using the

Thomas Mancusi: Yeah.

Jade Nakabayashi: tool and what's actually like valuable and needs to be elevated in order to sort of like elevate that in the

Thomas Mancusi: Yeah.

Jade Nakabayashi: tech.

Thomas Mancusi: Do you mind if I run I have to smoke a cigarette before I took my 12:30?

Jade Nakabayashi: Yeah. Yeah, of course. Thanks so much for your time.

Thomas Mancusi: All right. Later.

Jade Nakabayashi: I
